Subject: FY 14 Final IN EOY Report
IN FY 14 FINAL EOY.doc

Pat:

As promised at our conference call this afternoon attached is the Final End of Year Report for FY 14. As mentioned, the only change from the previous version is the typo on page 38 and 61 concerning the number of systems on the fixed base list. I anticipate that I will be sending you notes outlining the content and follow-up action items from our meeting sometime next week.

I want to congratulate you and your staff for running an outstanding program. As the report shows, Indiana maintains a program that proactively works with communities to offer customer service, achieve compliance, maintain accurate reporting using the latest data systems, offer innovative approaches like the lab-to-state reporting module, and work actively participate in regulation development and once these rules are promulgated, keep up with the ever increasing complexities of the drinking water program.

We appreciate your continued partnership, and look forward to working with you in the future to achieve our shared goals.

Bill Spaulding

Indiana State Program Manager

Groundwater and Drinking Water Branch
